

# Daylily 'Double Dream'

**An award-winning rebloomer with its first flush in early summer then repeating on and off into fall.**

## ***Hemerocallis 'Double Dream'***

- **Use:** Hemerocallis 'Double Dream' is a new hybrid daylily which has double triangular shaped flowers of soft peach colour. These appear from June to August, with mid green foliage beneath. Grow in mixed or herbaceous borders. Fully hardy, preferring fertile well drained but moist soil in full sun. Hemerocallis are really easy to grow, and need hardly any maintenance. The thick foliage covers the ground smothering weeds, and they are quick to establish. Extremely easy to grow --heat, humidity, drought, and poor soil tolerant.
- **Exposure/Soil:** Full– part sun (but must be 5-6 hours of afternoon sun) . Moist, well-drained soil, but not soggy. Use slow release fertilizer two times a year. Do not give too much nitrogen or they will not produce flowers. Once established needs only occasional water.
- **Growth:** Growing to a height of 18-22” tall and 12-24”wide.
- **Hardiness:** Zones 3-9; Perennial
- **Foliage:** Semi-evergreen. Long, thin, green leaves arch gracefully.
- **Flower:** Rebloomer! A beautiful vision of double soft peach on an early blooming daylily that reblooms giving you a long period of blooms each year. 4 1/2" blooms.

**Did you know that we recycle empty pots and trays? Please bring them back! Save the Earth!**
