

# Passionate Returns Daylily

Good for use  
as edging.  
Very heat  
tolerant!

## *Hemerocallis 'Passionate Returns'*

- **Use:** (AKA 'Dynamite Returns') From renowned daylily breeder Darrel Apps comes what he considers his best overall quality rebloomer to date. An everblooming daylily, 'Passionate Returns' blooms for about 3½ months beginning in mid-June in zone 7 or early July in zone 5. 4", rosy red, ruffled flowers have perfect form. Flowers are held just at the top of the foliage, with multiple branched scapes and lots of buds to make it extremely floriferous in the landscape. Its short stature and continuous flower show makes this the perfect daylily for growing at the front of the border and in containers.
- **Exposure/Soil:** Full– part sun (but must be 5-6 hours of afternoon sun) . Moist, well-drained soil, but not soggy. Use slow release fertilizer two times a year. Once established needs only occasional water.
- **Growth:** Fast-growing to 18" high and 18-24" wide.
- **Hardiness:** Zone 3-9; Perennial
- **Foliage:** *Semi-Evergreen foliage.*
- **Flower:** The multi-branched scapes embrace rose-pink 4" ruffled blossoms for nearly 3 months, an excellent rebloomer. *Early Midseason Bloomer, blooming in early July. Rebloomer, producing a second set of flowers. Fragrant flowers. \_Diploid with 22 chromosomes.*
