

# Red Hot Returns Daylily

## *Hemerocallis 'Red Hot Returns'*

**Good for use  
as edging.  
Very heat tol-  
erant!**

- **Use:** It is a vigorous grower that readily increases its foliage and it produces several flower scapes per fan. This daylily begins blooming in early midseason and repeats bloom all the way into fall. In zone 8, there are typically about 105+ days of bloom. And since it's an extended bloomer, each flower remains open for at least 16 hours. Diploid with 22 chromosomes.
- **Exposure/Soil:** Full– part sun (but must be 5-6 hours of afternoon sun) . Moist, well-drained soil, but not soggy. Use slow release fertilizer two times a year. Once established needs only occasional water.
- **Growth:** Fast-growing to 24-28” high and 18-24” wide.
- **Hardiness:** Zone 4-9; Perennial
- **Foliage:** Deciduous. Semi-Evergreen grass-like foliage.
- **Flower:** Brilliant cherry red, ruffled blossoms have a brightly contrasting yellow halo and an apple green throat. They rest just above the dark green foliage, held up there like a bouquet all summer long. Early, midseason rebloomer, blooming in early July.
