

Daylily 'Stella Bella'

Hemerocallis 'Stella Bella'

- **Use:** This vibrant little gem owes her good breeding to the legendary daylily Stella DeOro, but packs all her ancestors punch into a petite package. Tops out at 12 inches, making her a perfect choice for bordering the bed, and for container or even window box planting.
- **Exposure/Soil:** Full– part sun (but must be 5-6 hours of afternoon sun) . Moist, well-drained soil, but not soggy. Use slow release fertilizer two times a year. Do not give too much nitrogen or they will not produce flowers. Once established needs only occasional water.
- **Growth:** Fast-growing to 1 ft. high, flower stalks taller.
- **Hardiness:** Zone 3-9; Perennial
- **Foliage:** Deciduous. Thin, long leaves.
- **Flower:** Produces an abundance of golden yellow blooms over and over for up to 6 months a year! Each bloom may last just a day, but is quickly replaced by a succession of many more fresh blooms.

Not only tough, low maintenance, colourful, but is well suited to a wide range of uses and as such is a truly rewarding plant for the novice and experienced gardener alike!
