

# Heuchera Plum Crazy Olive

## *Heuchera 'Carnival Plum Crazy'*

- **Use:** Coral Bells are a versatile perennial. This villosa hybrid, part of the Carnival series, known for their tidy mounding habit and excellent heat and humidity tolerance, is a terrific choice for adding a touch of colour towards the front of a border.
- **Exposure/Soil:** Sun– part shade. More sun tolerant than other coral bells. Best when planted under other trees, but not too deep a shade or poor flowering and leaf color. Moist, well-drained soil, but not soggy. Use slow release fertilizer two times a year. Water regularly, when top 3 in. of soil is dry.
- **Growth:** Fast growth to 10-12 “tall, 12-14” wide.
- **Hardiness:** Zone 4-9; Perennial
- **Foliage:** Semi-evergreen. The large, ruffled leaves are deep purple with silver highlights and mauve undersides.
- **Flower:** Dainty flowers are held aloft on airy stems May through July.

Because of their low, mounding habit, they are often used as edging along paths or in containers. Try cutting a few of the tall flower scapes for fresh bouquets.
