

# Lucid Dreams Mysterious Coral Bells

## *Heuchera x 'Lucid Dreams Mysterious'*

- **Use:** A lucid dream is a dream during which the dreamer is aware that they are dreaming. With this new cultivar you will feel like you must be in a lucid dream each time you see them for real in your flower beds, patio containers or porch pots. The colors of the foliage and the vivid patterns, not to mention the amazing amounts of flowers they each produce will have you wondering – Am I awake? Or am I dreaming?
- **Exposure/Soil:** Part sun-shade. Best when planted under other trees, but not too deep a shade or poor flowering and leaf color. Moist, well-drained soil, but not soggy. Use slow release fertilizer two times a year. Water regularly, when top 3 in. of soil is dry.
- **Growth:** Moderate growing; 6-8" tall by 10-12" wide
- **Hardiness:** Zone 5-8; Perennial
- **Foliage:** Semi-evergreen. What a mysterious color combination. Are the leaves silver, red or celery green? This new selection will give your garden quite a show as the leaves emerge bright pinkish-red and age to burgundy and celery green.
- **Flower:** These plants produce tiny white flowers that are striking against their often boldly colored foliage.

Striking when massed in a woodland border or tucked into a rock garden.
