

# Lucid Dreams Vivid Heuchera

Striking when massed in a woodland border or tucked into a rock garden.

## *Heuchera x 'Lucid Dreams Vivid'*

- **Use:** A lucid dream is a dream during which the dreamer is aware that they are dreaming. With this new cultivar you will feel like you must be in a lucid dream each time you see them for real in your flower beds, patio containers or porch pots. The colors of the foliage and the vivid patterns, not to mention the amazing amounts of flowers they each produce will have you wondering – Am I awake? Or am I dreaming?
- **Exposure/Soil:** Part sun-shade. Best when planted under other trees, but not too deep a shade or poor flowering and leaf color. Moist, well-drained soil, but not soggy. Use slow release fertilizer two times a year. Water regularly, when top 3 in. of soil is dry.
- **Growth:** Moderate growing; 10-12" tall by 15-18" wide
- **Hardiness:** Zone 5-8; Perennial
- **Foliage:** Semi-evergreen. Intense chartreuse leaves glow in the morning or afternoon sun on this new coral bell we call Vivid. The super frilly leaves emerge early and are followed by strong, tall spikes of nearly white flowers. As the leaves mature, they turn apple green and make any garden spot brighter with their vivid hue.
- **Flower:** White flowers hover above the blazing leaves.
