'Silver'

**These deer resistant blooming beauties and a colorful splash of in the shade garden.**

## ***Heuchera 'Northern Exposure™ Series'***

- **Use:** Northern Exposure™ Series was bred for strength in the North so it's tolerance for heat and humidity came as a great and welcome surprise in trials as far South as Miami. It seems nothing fazes this group; cold winters, humid, hot summers and just plain rainy weather are not going stop them from providing the easiest perennial color possible. Native to the US.
- **Exposure/Soil:** Part sun-shade. Best when planted under other trees, but not too deep a shade or poor flowering and leaf color. Moist, well-drained soil, but not soggy. Use slow release fertilizer two times a year. Water regularly, when top 3 in. of soil is dry.
- **Growth:** Moderate growing; 13-16" tall by 24" wide
- **Hardiness:** Zone 3-10; Perennial
- **Foliage:** Semi-evergreen. Scalloped and ruffled foliage has great rust resistance and comes in an array of colors in this series.
- **Flower:** Dainty flowers hover above the colorful leaves for months.
