

# Grape Timeless Coral Bells

Breeders have come a long way with creating Heucheras with fantastic flowers, but this one also has very attractive foliage that forms a compact, dense clump. The flowers stand in perfect proportion and contrast to the foliage.

- **Use:** Do you love 'Berry Timeless' but hoped for that flowering performance in different foliage colors? Your wish is granted! The Timeless Collection now boasts different colors such as purple, yellow, black, and silver. Each has a reblooming flower performance like their predecessor with similar sizes for ease in combination. Coral bells are easy to grow and blend easily with most other perennials in the landscape. Because of their low, mounding habit, they are often used as edging along paths or in containers. Try cutting a few of the tall flower scapes for fresh bouquets.
- **Exposure/Soil:** Part sun-shade. Best when planted under other trees, but not too deep a shade or poor flowering and leaf color. Moist, well-drained soil, but not soggy. Use slow release fertilizer two times a year. Water regularly, when top 3 in. of soil is dry.
- **Growth:** Clumping foliage 8-10" tall(20" in bloom), 16-18" wide.
- **Hardiness:** Zone 4-9; Perennial
- **Foliage:** Semi-evergreen. Chartreuse yellow foliage has a silver overlay and matures to lime green. Foliage color is best in partial sunlight, and greener in full shade. The foliage is more chartreuse yellow than the silver gray of 'Berry Timeless'.
- **Flower:** Intense, rich rose pink flowers contrast beautifully with the bright foliage. Flower height is proportionate to the size of the plant.
