

Marvelous Marble Coral Bells

Heuchera americana 'Marvelous Marble'

- **Use:** In spring, the new foliage emerges purple. Through the seasons, the foliage matures to deep green with prominent reddish purple veining and a light silver overlay. The flower stems are quite short, bearing creamy white flowers a bit earlier than is typical for Heucheras. Coral bells are easy to grow and blend easily with most other perennials in the landscape. Because of their low, mounding habit, they are often used as edging along paths or in containers.
- **Exposure/Soil:** Part sun-shade. Best when planted under other trees, but not too deep a shade or poor flowering and leaf color. Moist, well-drained soil, but not soggy. Use slow release fertilizer two times a year. Water regularly, when top 3 in. of soil is dry.
- **Growth:** Fast growth to 8-12 "tall, and 16" wide.
- **Hardiness:** 5-8; Perennial
- **Foliage:** Semi-evergreen. This new specimen is all about its green foliage with unique dark veins.
- **Flower:** Creamy white flowers form earlier than other Heuchera varieties. Try cutting a few of the tall flower scapes for fresh bouquets.

We love the strength and versatility of this plant. They really add color to containers!
