

Premium Tapestry Heucherella

The colorful foliage pairs well with Hostas, Hellebore, or Hardy Ferns. Use as a foreground planting to Hydrangeas or other tall growing Shrubs. Stunning when used as a Groundcover or edging lining a shaded pathway.

Heucherella 'Tapestry'

- **Use:** Foamy bells are easy to grow and blend easily with most other perennials in the landscape. Because of their low, mounding habit, they are often used as edging along paths or in containers. Try cutting a few of the tall flower scapes for fresh bouquets
- **Exposure/Soil:** Part sun-shade. Best when planted under other trees, but not too deep a shade or poor flowering and leaf color. Moist, well-drained soil, but not soggy. Use slow release fertilizer two times a year. Water regularly, when top 3 in. of soil is dry.
- **Growth:** Fast growth to 16-18 "tall, 24" in bloom overall, by 12-18" wide.
- **Hardiness:** 5-8; Perennial
- **Foliage:** Semi-evergreen. The dark-centered leaves are colored blue green in spring and summer and change to green with dark centers in fall and winter. New leaves have blue iridescence.
- **Flower:** Sprays of delicate, tiny pink lowers float on wiry stems above neat mounds of vibrant foliage in spring.
