

Midnight Marvel Hibiscus

Swamp Rose-Mallow hybrid that sports leathery, deep purple foliage all season long. Spectacular 8-9" single carmine-red blossoms open from near-black buds and continue blooming down the stems. Flowers are attractive to hummingbirds, and the plants are deer resistant, too.

Hibiscus 'Midnight Marvel'

- **Use:** These North American native plants bring massive, tropical-looking flowers all the way to zone 4. Although later to emerge than most perennials in spring, these are fast growing plants capable of adding an inch of new growth a day. Excellent at brightening up end of season gardens.
- **Exposure/Soil:** Plant in full sun to partial sun. Use slow release or water soluble fertilizer. Keep soil moist watering under leaves and flowers for best results. Prefers to be watered under the leaves.
- **Growth:** Full, well branched plants grow QUICKLY to 5-5.5' tall and wide in one season.
- **Hardiness:** **Zone** 4-9 Perennial. Very heat tolerant!
- **Foliage:** Deciduous; Dark foliage is a stunning foil in the garden.
- **Flower:** Glossy, black-red buds which open to 8-9", deep scarlet red flowers. Since this variety is an indeterminate bloomer (has buds at several nodes up the stem), it blooms for an extended period from mid-summer into early fall. We have been incredibly impressed by the growth and performance of 'Midnight Marvel' and think you will be equally delighted!
