Hibiscus 'Valentine's Crush' PP35170

- **Use:** a new release perennial with cherry-red flowers reaching up to eight inches across! This summer beauty can reach up to five feet tall in a sturdy columnar habit with the top half covered in flowers. Even though this 'Valentine's Crush' will show up to the date way later than Valentine's Day, we can assure you this plant will never break your heart. Generally deer resistant.
- **Exposure/Soil:** Prefers full sun, but will tolerate a few hours shade. Grows best in rich soils, consistent moisture and full sun. Also does well in clay soils and will tolerate wet soils. Good air circulation may help to prevent disease.
- **Growth:** It has a plant height of 5' tall and 40" wide. Upright, columnar habit is very sturdy and resists lodging. Old stems should be pruned to the ground in spring.
- **Hardiness:** Zone 4-9 Perennial. Mulch during winter to protect roots from frost and prune in early spring for bushier growth.
- **Foliage:** Deciduous. The leaves have a large, ovate shape and a dark bronze cast in full sun.
- **Flower:** Bright red flowers open flat at 8" wide from summer to fall frost.
