

Blueberry Muffin Hosta

Hostas are exceedingly popular perennials in today's gardens due to their versatility in the landscape. Their subtle colors, tall flower scapes, and broad, coarse leaves fill a niche in garden designs that few other plants can achieve. Their large leaves provide excellent coverage for dying bulb foliage. Hostas also grow well in city environments where the air may be polluted by car exhaust, etc.

Hosta 'Blueberry Muffin'

- **Use:** This excellent blue hosta is a strong grower and reliable performer in the landscape. It forms a medium sized mound of large, blue, rounded leaves that are rugose and puckered in unusual patterns. Late in the season, the foliage transitions to green. Attractive light mauve speckles appear on the petioles. The result of a cross between Hosta 'Frances Williams' and Hosta 'Fall Bouquet'.
- **Exposure/Soil:** Part sun (best)—shade. Acid, moist, well-drained soil, but not soggy. Use slow release fertilizer two times a year.
- **Growth:** Mature height of 14" tall and 36" wide.
- **Hardiness:** Zone 3-8; Perennial
- **Foliage:** Deciduous. Medium sized mound of blue foliage with thick leaves that are puckered and slightly rippled. The petioles are speckled with mauve which creates a nice contrast with the blue leaves. Good grower that will always look good with very nice blue color.
- **Flower:** Lavender flowers on proportional scapes just above the foliage in early summer.
