

Hosta 'Diana Remembered'

**Fragrant and
very easy to
grow!**

Hosta 'Diana Remembered'

- **Use:** Named in honor of the late Princess Diana, this is a beautiful variety with thick, broad, substantial green leaves edged in silvery white. The late-summer flowers are exceptionally large and fragrant.
- **Exposure/Soil:** Part sun (best)–shade. Acid, moist, well-drained soil, but not soggy. Use slow release fertilizer two times a year.
- **Growth:** Grows to about 15 inches tall and 24 inches wide, with a mounded habit. Flowering stems rise to about 24 inches tall in total.
- **Hardiness:** Zone 3-9; Perennial
- **Foliage:** Deciduous. Foliage is dusky green at the center with a wide creamy or silvery white margin. The leaves are fairly matte and they have a softly rippled texture.
- **Flower:** In midsummer, 3-inch-long tubular white flowers appear in clusters atop 24-inch-tall stems, opening in succession over a number of weeks. These white flowers are fragrant and exceptionally large compared to many other hostas.
