

Shadowland Coast to Coast Hosta

PW
PROVEN
WINNERS®

Hostas are exceedingly popular perennials in today's gardens due to their versatility in the landscape. Their subtle colors, tall flower scapes, and broad, coarse leaves fill a niche in garden designs that few other plants can achieve. Their large leaves provide excellent coverage for dying bulb foliage. Hostas also grow well in city environments where the air may be polluted by car exhaust, etc.

Hosta 'Shadowland Coast to Coast' PP26469 CPBR5335

- **Use:** 2020 Proven Winners National Hosta of the Year® This striking hosta forms a giant clump of thick, pucker-edged, gold leaves with wavy edges. Gold coloring becomes brighter in morning sun in summer. Pale violet flowers. This hosta tends to be more slug resistant because of its thick substance foliage and rigidly upright habit. It can be grown as a single specimen in a large container or in a prominent place in the landscape. This premium hosta variety is part of a group called Shadowland made up of the finest hostas available today. To be considered a premium hosta, plants must perform superbly in many zones. They must also exhibit exemplary garden presence and performance, have a long season of appeal in the landscape, have leaves of good substance, and demonstrate a greater resistance to common garden pests. The perfect choice for shade, hostas are exceedingly popular perennials in today's gardens due to their versatility in the landscape. Their subtle colors, tall flower scapes, and broad, coarse leaves fill a niche in garden designs that few other plants can achieve. Their large leaves provide excellent coverage for dying bulb foliage. Hostas also grow well in city environments where the air may be polluted by car exhaust, etc.
- **Exposure/Soil:** Part sun–shade. Acid, moist, well-drained soil, but not soggy. Use slow release fertilizer two times a year.
- **Growth:** Vigorous growing clump, to 30-36" (in flower) high and 36" wide.
- **Hardiness:** Zone 3a-9b; Perennial
- **Foliage:** Deciduous; A giant, solid gold hosta that makes a striking specimen in the shade garden. Its foliage emerges gold in spring and turns lighter gold with a bit more sun exposure in the summer months. As the leaves mature, they become thick and pucker-edged with wavy edges and have nearly white undersides.
- **Flower:** Lavender flowers appear in midsummer.
