

Gigantosaurus Shadowland® Hosta

Hostas are exceedingly popular perennials in today's gardens due to their versatility in the landscape. Their subtle colors, tall flower scapes, and broad, coarse leaves fill a niche in garden designs that few other plants can achieve. Their large leaves provide excellent coverage for dying bulb foliage. Hostas also grow well in city environments where the air may be polluted by car exhaust, etc.

Hosta hybrid 'Gigantosaurus' PP35135

- **Use:** The massive size and leaves of 'Gigantosaurus' will have your garden feeling like Jurassic Park. This variety will come roaring to life in early spring as one of the first Hostas to emerge. Large blue leaves have a wavy yellow margin. In summer yellow margins turn to creamy white. Pale lavender flowers first begin appearing in early summer and are held just above the foliage.
- **Exposure/Soil:** Part sun–shade. Acid, moist, well-drained soil, but not soggy. Use slow release fertilizer two times a year. Clean away the dead foliage after frost to prevent insect problems.
- **Growth:** Vigorous growing clump, to 30-32" (in flower) high and 24-30" wide.
- **Hardiness:** Zone 3-9; Perennial
- **Foliage:** Deciduous. Large blue leaves have a wavy yellow margin. In summer yellow margins turn to creamy white.
- **Flower:** Lavender flowers appear in midsummer.
