

# Sunshine Glory Hosta

## *Hosta 'Sunshine Glory'*

- **Use:** This Kevin Vaughn hybrid is still one of the most sought-after hostas of the early 1980s. The 5' wide clumps are composed of thick, round, intensely corrugated, limey-chartreuse leaves, each with a dramatic wide white border. These stunning clumps are topped in midsummer with 29" tall scapes of lavender flowers.
- **Exposure/Soil:** Part sun–shade. This one does have a good amount of sun tolerance, but in the South will still see some leaf burn in late summer if in full sun. Acid, moist, well-drained soil, but not soggy. Use slow release fertilizer two times a year.
- **Growth:** Will grow 19" tall and spreads up to 43-60" wide.
- **Hardiness:** Zone 3a-8b; Perennial
- **Foliage:** Deciduous. Heavily corrugated leaves have wide, gold margins.
- **Flower:** Large, bell-shaped, pale lavender blossoms in mid summer.
