

Vulcan Hosta

**Part sun or
shade loving
and
very easy to
grow!
A fast grow-
ing large
type!**

Hosta 'Vulcan'

- **Use:** A brilliant tricolor Hosta with a white center, yellow streaks, and dark green edges, this sport of 'Captain Kirk' so delighted its breeder (Hans Hansen) that he planted it beside his front door! Cupped, slightly elongated heart-shaped leaves mound lavishly on this plant, topped by 2-foot white scapes bearing lavender blooms. And the pure white center will not melt out, no matter what the weather does!
- **Exposure/Soil:** Sun–shade. Acid, moist, well-drained soil, but not soggy. Use slow release fertilizer two times a year.
- **Growth:** Will grow 22” to tall(28” in bloom) and spreads up to 36” wide.
- **Hardiness:** Zone 5-8 Perennial
- **Foliage:** Deciduous. The broad, heart-shaped leaves display a white center and contrasting dark green margins with lighter yellow coloring that jets towards the white centers.
- **Flower:** Bell shape flowers are pale lavender in color on white stems and appear during mid Summer.
