

Blue Velvet™ St. John's Wort

Hypericum x 'Cfflpc-1'

- **Use:** A cultivar with attractive blue foliage developed by noted plantsman Paul Cappiello of Yew Dell Gardens in Crestwood KY, Blue Velvet™ hypericum boasts numerous golden-yellow flowers in mid-summer. Excellent for extreme slopes or sandy soils; spreads by underground stems; moderate drought tolerance.
- **Exposure/Soil:** Full-sun is best, although plants will adapt to partial shade. Too much irrigation or wet soils is not a good thing. A light trimming with the clippers in late winter (February) will encourage new growth in spring.
- **Growth:** Grows 2-3' tall and wide.
- **Hardiness:** Zone 4-8; Shrub
- **Foliage:** Evergreen; Features distinct cool-toned, silvery blue to blue-green foliage that is fragrant, finely textured, and narrow
- **Flowers:** Bright canary yellow flowers that contrast with the dark green foliage. Each flower lasts one to two weeks. It blooms mostly in June and July, and sporadically most of the summer.

Super fast groundcover for erosion control in difficult areas.
