

Magical Universe St John's Wort

Super fast groundcover for erosion control in difficult areas.

Hypericum x inodorum 'Magical Universe'

- **Use:** Beautifully colored berries on perfectly formed plants, whether it's in the garden, as a lovely addition to any floral bouquet, or a brightly colored accent on your doorstep in the fall. This new line of St. John's wort gives you break-through, saturated colors that have never been seen before. It will fill your fall garden with interest and your floral arrangements and containers with large, shiny long-lasting fruits!
- **Exposure/Soil:** Full-sun is best, although plants will adapt to partial shade. Too much irrigation or wet soils is not a good thing. A light trimming with the clippers in late winter (February) will encourage new growth in spring.
- **Growth:** Rapid growth to 30-36 inches tall and wide.
- **Hardiness:** **Zone** 6-9; Perennial (shrubby growth)
- **Foliage:** Semi-evergreen/ deciduous; Incredibly rust resistant, deep, bluish-green foliage.
- **Flowers:** Small, bright yellow, showy flowers that bloom in June. Fruit forms as blooms pass and this fruit darkens to deep red in fall. Easy to grow with great summer color from flowers and fruit from June until frost.
