

# His Royal Highness Bearded Iris

**A befitting royal name for an excellent Tall Bearded Iris. Ruffled, medium purple standards and falls will bring a bold color to your early summer garden, and then again when it reblooms in the fall.**

## *Iris 'His Royal Highness'*

- **Use:** His Royal Highness reblooming bearded iris delivers color fit for a king with petals a rich blend of magenta, violet, and wine hues. Gold beards add a complete crowning touch. A consistent fall re-bloomer throughout his range. All parts of Iris are deer and rabbit resistant.
- **Exposure/Soil:** Will produce the most flowers if they receive a full day of sun, but will also perform reasonably well with a half day of sun. The most critical growing factor is the moisture level of the soil and drainage. They will absolutely not tolerate "wet feet" (too much water will cause the rhizomes to rot) and require very well-drained soil at all times of the year. They will grow in any good garden soil as long as this drainage is provided. Generally heavy feeders and should be fertilized 3 times per year: first in the spring when new growth appears, second right after blooming, and third in the fall. When planting them for the first time or when transplanting, use a no-nitrogen fertilizer such as 0-10-10 worked into the soil.
- **Growth:** Grows 34-40" tall. Division is recommended every 3-4 years to maintain healthy plants and achieve the maximum bloom. The best time of year to plant irises is in late summer after they are done blooming. Dig up the entire clump and use a sharp knife to cut apart the rhizomes. Keep only the newer ones around the outer edge of the clump and discard the old, woody center. Replant the new divisions 12-18 in. apart to allow ample room for new growth and good air circulation. Planting at the correct level is critical to the plant's health and flower production. Rhizomes should be planted so the soil barely covers the top of them, or 1-2 in. deep. Doing so will help to prevent soft rot.
- **Hardiness:** Zone 3-10; Perennial
- **Foliage:** Deciduous. Green, sword-shaped leaves.
- **Flower:** Deep purple flowers with white veining accents in late spring and a reliable late summer-fall rebloomer.
