

Twisted Arrows Rush

An excellent architectural element to containers or moist garden areas.

Juncus effusus 'Spiralis'

- **Use:** Whimsical and unique texture for container or garden! An inspired combination, offering the contrast of shiny blue and green along with straight and twisted stems. Nice water garden feature.
- **Exposure/Soil:** Sun- part sun. Loves wet soil and water garden or bog conditions.
- **Growth:** Grows 30-36" H x 12-14" W
- **Hardiness:** Zone 6-10; Perennial
- **Foliage:** Evergreen; The foliage is topped by golden plumes in late summer (they make lovely Everlastings), but it's the leaves that are the real draw here. Distinctive and colorful, they add interest wherever they appear.
- **Flower:** Flowers are brownish and insignificant.
