

# Pink Chablis Spotted Deadnettle

## *Lamium maculatum* 'Pink Cahblis'

- **Use:** Silvery white leaves with green edges form a lush groundcover that is topped by charming candy pink flowers in summer. Brightens shady areas, and tolerates dry shade conditions when established. Bred for heat tolerance! Beautiful trailing from mixed containers or used to edge borders. If you're looking for a uniquely colorful groundcover that maintains some color even during the winter months,
- **Exposure/Soil:** Prefers part sun to shade! Use slow release or water soluble fertilizer in late spring. Prefers to be kept moist and likes rich soil. Water under leaves and flowers for best results.
- **Growth:** This compact type grows 8-12" tall and plant 14-24" apart.
- **Hardiness:** Zone 4-9 Perennial.
- **Foliage:** Semi-evergreen; The leaves have serrated edges and tiny veins that are highlighted with various shades of green.
- **Flower:** Produces a spring bloom of cotton candy pink blossoms that repeat throughout the summer. The effect of the tiny spots of sweet pink against the green edged, silver leaves is refreshing!

Use as a groundcover for cover shady banks. Also excellent used in containers.
