Lantana x 'Bandito Series'

- **Use:** If you are looking for a tough plant it's hard to beat lantana. Lantana are heat tolerant, use little to no supplemental water in the landscape, will tolerate less than ideal soils and usually don't need to be deadheaded. If you are looking for a plant that will thrive on neglect, lantana is the champ. Useful as substitute for annuals in flower beds or containers. Attracts butterflies. Tolerates heat.
- **Exposure/Soil:** Full sun– part sun. Drought tolerant once established. Must have good winter drainage or they will rot.
- **Growth:** Mounded form to 12-14" tall and wide.
- **Hardiness:** Zone 8-11, Annual/ Tender Perennial. Mulch well in the winter. Do not cut back stems until April after winter is passed.
- **Foliage:** Deciduous. Green-lance leaves have a lemony smell. Cutting grown.
- **Flower:** The blooms are much larger than other varieties providing more color. Though the plants are more compact, the blooming power is just as vigorous as the larger varieties.
