

Chapel Hill Gold Lantana

Lantana camara 'Chapel Hill Gold'

- **Use:** Chapel Hill Gold is a Dr. Mike Dirr creation that is a sport from Chapel Hill Yellow which was cross between 'Miss Huff' (the most cold hardy of all Lantana) from which it gets its superior cold hardiness, and 'New Gold' Hardy Lantana from whence it gets its bright yellow flowers and low and spreading growth habit of 16 inches tall by 2 to 3 feet wide. It is fast growing and quick to flower so gardeners in colder climates can enjoy it as an annual.
- **Exposure/Soil:** Full sun– part sun. Drought tolerant once established.
- **Growth:** Grows 2-3' tall and 24-30" wide. Prune occasionally to keep in the topiary form.
- **Hardiness:** Zone 7-11, Tender Perennial. Mulch well in the winter. Do not cut back stems until following April after winter is passed.
- **Foliage:** Deciduous. Scented leaves. Cutting grown.
- **Flower:** Egg yolk yellow clusters of nectar rich flowers shine brightly against the dark glossy green foliage of this throughout the growing season. An improvement over New Gold with larger flower clusters, increased vigor, as well as improved cold hardiness.

Heat tolerant, drought tolerant, deer resistant, little to no need for deadheading, versatile, fragrant, attractive to butterflies and hummingbirds, what is there not to love?
