

'Whoops-a-Daisy' Shasta Daisy

Shasta Daisies are all-time favorites for the perennial border. They mix so effortlessly with other perennials that no garden should be without them!

Leucanthemum × superbum 'Whoops-a-Daisy' PP27259

- **Use:** 'Whoops-a-Daisy' was no accident! It is an improvement over the old standard 'Snowcap' in many respects; and it's time to look at this new dwarf *Leucanthemum*. Try growing this cute perennial in containers or in the landscape where it will shine brightly near the front of the border.
- **Exposure/Soil:** Plant in full sun to partial sun. Use slow release or water soluble fertilizer. Keep soil moist watering under leaves and flowers for best results. Drought tolerant once established.
- **Growth:** Fast growing to 15" tall in bloom. Spreads to 22" in width.
- **Hardiness:** Zone 5-9 Perennial. Very heat tolerant! Mulch around plant in the winter.
- **Foliage:** Deciduous. Dark green foliage.
- **Flower:** Completely blanketed in large 3-4", white flowers with gold centers from early through midsummer. It has better flower coverage and a more uniform habit compared to 'Snowcap', and the individual flowers have a fuller, fluffier appearance. Removing faded flowers will greatly increase the blooming time.
