

Cat's Meow Catmint

Nepeta x faassenii 'Cat's Meow' PP24472

- **Best Seller**
- **Fragrant flower**
- **Fragrant foliage**
- **Continuous bloom or re-bloom**
- **Heat tolerant**
- **Drought tolerant**

- **Use:** No catmint is a more beautiful, uniform grower than Cat's Meow Nepeta. Its flowers are dense and colorful, and its habit is more refined. Plus, it stands strong with no flopping, getting wider and growing to a broad mound as the season progresses. Nepeta are idea for rock gardens, containers and border fronts. Dependable, long-blooming, deer and rabbit resistant – absolutely trouble free. One of the best plants to edge or under plant a rose bed.
- **Exposure/Soil:** Plant in full sun to partial sun, in well drained soil. Use slow release fertilizer two times a year.
- **Growth:** Spanning 2-3' tall and 2-3' wide. Trim to the ground each fall after frost for best shape.
- **Hardiness:** Zone 3-8; Perennial
- **Foliage:** Deciduous. Green foliage releases a scent that we find pleasant but that deer despise so you don't have to worry about it being nibbled by these common pests.
- **Flower:** Neatly rounded and covered top to bottom for most of the summer in bubbly blue blossoms. Attractive not only to appreciative horticulturalists but to every manner of pollinator, butterfly and hummingbird as well. Trim old flowers occasionally to keep a tidy plant.
