

Mons Jules Elie Peony

**Huge
fragrant
blooms great
for cutting!**

Paeonia lactiflora 'Mons Jules Elie'

- **Use:** Peonies are classic garden plants that add a bit of nostalgia and charm to the garden. Their fragrant blooms and lush foliage have made them popular for years, and with the recent resurgence in breeding, they will continue to improve. Peonies are simple to grow and can be utilized in many ways, including mass plantings, specimens, or hedges.
- **Exposure/Soil:** Full sun–light shade shade (not deep shade); Water regularly, when top 3” of soil is dry. Use slow release fertilizer twice a year. Once established needs only occasional water.
- **Growth:** Grows 24 to 30 inches tall.
- **Hardiness:** 3-8; Perennial
- **Foliage:** Deciduous. Lobed leaves may go dormant in hot summers.
- **Flowers:** *Large, light rose-pink. Center incurved and silvered with light grayish pink coloring. Free flowering, fragrant and good cut flower variety. Stems need support when grown in the landscape.*
- **Tips:** Plant them shallow, mulch in the summer, take off the mulch in the winter, and they prefer a little afternoon shade. Cold winters will ensure lots of blossoms so plant them where they will get cold in the winter. Do not cut flowers the 1st year off bush. It takes 7 years for a shrub to truly heat it's peak peony production. (Typically we sell 2-3 year old plants)
