

Popstar Blue Balloon Flower

This Pop Star™ balloon flower boasts huge blue flowers that burst into a star shape! It is a very compact habit, making it great for outside, or inside. Works well in a rock garden, as a border front for beds or patio containers, and is easy and fast to grow!

Platycodon 'Popstar Blue'

- **Use:** Balloon Flowers are summer-blooming cousins to the more familiar Bellflowers. This selection forms a compact mound of green foliage, bearing inflated buds that open into star-shaped violet-blue blossoms. The small habit of this variety makes it a good choice for rock gardens and mixed containers. Division is seldom necessary, and not always very successful because of the carrot-like root.
- **Exposure/Soil:** Full– part sun (but must be 5-6 hours of afternoon sun) . Moist, well-drained soil, but not soggy. Use slow release fertilizer two times a year. Water regularly, when top 3 in. of soil is dry.
- **Growth:** Reaches 6-8 in. tall, 10-12 in. wide.
- **Hardiness:** Zone 3-9; Perennial
- **Foliage:** Evergreen if brought indoors in winter
- **Flower:** This heavy bloomer has very large blue flowers that begin in the shape of a balloon before opening, hence it's name.
