

Lacy Blue Self Heal

Prunella grandiflora 'Lacy Blue'

Commonly called Large Self-heal because of its use in herbology.

- **Use:** One of the longest blooming ground covers in any flower garden. Prunella drought tolerant ground cover plants feature lacy green leaves and clusters of violet-blue whorled blooms. From late spring through the middle of autumn, it sets new bloom clusters, and it just doesn't seem to know when to quit performing! Prunella uses include: ground cover, edging, xeriscaping, bedding or container plant.
- **Exposure/Soil:** Part sun-shade in the South. Best when planted under trees, but not too deep a shade or poor flowering and leaf color. Moist, well-drained soil, but not soggy. Use slow release fertilizer two times a year. Water regularly, when top 3 in. of soil is dry.
- **Growth:** Fast growth to 6-8" tall, by 8-9" wide.
- **Hardiness:** Zone 5-9; Perennial
- **Foliage:** Semi-evergreen. Medium-dark green leaves hug the ground.
- **Flower:** Trusses of rich-violet/ blue flowers from June to September.
