

Mayan Purple Petunia

Ruellia simplex 'Mayan Purple'

- **Use:** The blooms are borne on the top of the plant in clusters of trumpet-shaped flowers. This plant can tolerate quite a bit of abuse and neglect and has great drought tolerance. This variety has purple flowers and dark green leaves. Sterile.
- **Exposure/Soil:** Mexican Petunias prefer full sun but will tolerate some shade (to the sacrifice of some flowering). Use slow release or water soluble fertilizer. Keep soil moist watering under leaves and flowers for best results.
- **Growth:** The plants are erect, 12-24 inches tall and have few branches.
- **Hardiness:** 7-11 Perennial, Must be mulched in the winter.
- **Foliage:** Deciduous. The leaves are 2-5 inches long, narrow at the base and very short.
- **Flower:** The flowers are much like those of a cultivated petunia however they are a bit more cupped and funnel-like. Purple blooms spring to fall.

This need Mexican Petunia is sterile and will not reseed.
