

Golden Japanese Woodland stonecrop

Sedum makinoi 'Ogon'

- **Use:** Turns out, this sedum hates full sun but thrives in part sun to light shade and, thankfully, my subsequent attempts have fared superbly. hails from the southern Japan provinces of Honshu, Kyushu, and Shikoku where it can be found in moist, shady, rocky areas...not your typical sedum habitat. A wonderful Drought tolerant.
 - **Exposure/Soil:** Plant in part sun for best results. Prefers well-drained soil, but It will tolerate most soil types and is drought resistant.
 - **Growth:** Grows 4" tall and 18" wide in 2years and continues to spread.
 - **Hardiness:** Zone 7b-9b; Perennial
 - **Foliage:** Semi-deciduous. This forms a trailing mat of succulent golden-yellow leaves.
 - **Flower:** The yellow flowers in midsummer are nearly unnoticeable against the golden foliage.
- Drought tolerant and so easy to grow! Very good at controlling weeds also.**
