

Brandywine Foamflower

Tiarellas can be grown in containers and in the landscape anywhere that dappled to full shade can be provided. They pair beautifully with Hostas and ferns. Tiarellas enjoy popularity thanks to their shade tolerance, unusual leaf shape, dramatically marked foliage, repeat flowering, and light fragrance.

Tiarella 'Brandywine'

- **Use:** Rated as one of the most vigorous of the genus. A strong grower with glossy, rugose leaves and excellent bronze fall and winter color. Bold, creamy white flowers persist for 6 to 8 weeks. A robust clump former with some short runners in spring and fall. A beautiful addition to the garden, perennial border, shade garden or the rock garden. Native to North America.
- **Exposure/Soil:** Prefers semi-shade (morning sun and afternoon shade best) and good drainage. Tolerates cold exposed locations. Good drainage is a must!
- **Growth:** Clumping foliage 8 in (10in in flower) tall, 12 in. wide.
- **Hardiness:** Zone 4-9; Perennial
- **Foliage:** Evergreen. Glossy leaves with red centers and striking bronze color in fall and winter.
- **Flower:** Small, starry white flowers are borne on short, upright stems in spring. The fruit is a small lopsided capsule that splits into two segments full of shiny black seed.
