

Spring Symphony Foamflower

Tiarellas can be grown in containers and in the landscape anywhere that dappled to full shade can be provided. They pair beautifully with hostas and ferns. Tiarellas enjoy popularity thanks to their shade tolerance, unusual leaf shape, dramatically marked foliage, repeat flowering, and light fragrance.

Tiarella 'Spring Symphony' PP12397

- **Use:** The perfect perennial for spring interest in the shade garden. Finely dissected green leaves have dramatic dark burgundy centers and form a rounded, clumping habit. Light pink bottlebrush-like flowers. Due to the long flowering period, this perennial is very attractive in both summer and autumn. A beautiful addition to the garden, perennial border, shade garden or the rock garden. Native to North America.
- **Exposure/Soil:** Prefers semi-shade (morning sun and afternoon shade best) and good drainage. Tolerates cold exposed locations;.
- **Growth:** Clumping foliage 7" tall, 10 in. wide.
- **Hardiness:** Zone 4-9; Perennial
- **Foliage:** Evergreen. A smooth melody of compact foliage with leaves "painted" with black along the mid-rib.
- **Flower:** Profuse, light pink flowers reach their crescendo in mid-spring. Prune off old flowers to extend the bloom season. The fruit is a small lopsided capsule that splits into two segments full of shiny black seed.
