

# Angel Wings Foamflower

- Key Points**
- 1 Long flowering period
  - 2 Pollinator-friendly
  - 3 Striking bi-colored foliage
  - 4 Great shade plant
  - 5 Low maintenance

## *Tiarella* 'Angel Wings'

- **Use:** Tiarella Angel Wings has a compact, upright habitus and beautiful, two-tone leaves: green with a maroon center. The leaves are nicely incised, making them look like wings. Angel Wings gives a lot of flowers in April to June and again in September-October. The pink flower buds become white flowers that are very attractive to pollinators. Due to the long flowering period, this perennial is very attractive in both summer and autumn. A beautiful addition to the garden, perennial border, shade garden or the rock garden.
- **Exposure/Soil:** Prefers semi-shade and good drainage. Tolerates cold exposed locations;.
- **Growth:** Clumping foliage 10- in. tall, 10-12 in. wide; flower spikes 15 in. tall.
- **Hardiness:** Zone 4-9; Perennial
- **Foliage:** Evergreen Rosettes of large, deeply lobed heart-shaped leaves that have dark maroon veining.
- **Flower:** Dense, upright racemes of fluffy, pale pink flowers bloom from late spring into summer. However, its major advantage above other Tiarellas is the heat tolerance. The fruit is a small lopsided capsule that splits into two segments full of shiny black seed.
