Deltini™ Blue

Deltini™ Yellow

Deltini™ Blue  
Purple Wing

Low spreading compact habit. Superb heat and weather tolerance. Great annual for planting in planters or in beds.

## *Viola wittrockiana* 'Deltini Series'

- **Use:** This multiflora series is excellent for the South in winter and will hold up better to bad weather compared to larger faced pansies. Flower colors of satiny richness held on short, flop-proof stems! Very tolerant of unseasonable heat and frosty chill. Pansies are the showstoppers of the winter garden, packed with weather-tough vigor.
- **Exposure/Soil:** Plant in full sun. Must amend the soil if you have poor soil (like red clay). We recommend a peat based Soil. Require different fertilizer than most plants as they grow in the winter. Use slow release or water soluble fertilizer with Nitrate not Ammonium nitrogen form of fertilizer for best results from December to March.
- **Growth:** The plants are just about 3-5 inches high and 4 to 6 inches wide, so they cover themselves with flowers.
- **Hardiness:** Zone 6-10 Perennial, Reseeds but treated as an Annual as they are not attractive in the summer, but could possibly survive with other plants shading them until fall when they will return. For the South though we tend to pull them out and replace with other high color plants.
- **Foliage:** Semi-Evergreen; Green foliage.
- **Flower:** Cheerful blooms bloom very well under adverse winter conditions. Blooms nonstop from October until April!
