

# Trailing Freefall Pansy

Non-stop flowers from October until April!  
You won't believe the flower power!  
OUR FAVORITE WINTER BLOOMER!

## *Viola x wittrockiana 'Freefall Series'*

- **Use:** Forms a tidy, cascading mound of foliage up to 8" high and 15" wide that spills gently over the edge of containers without getting leggy. Blooms resemble vivid butterflies and appear en masse from Fall into Spring (sometimes they never go dormant in summer in the right location). Deadhead regularly to prolong bloom season. Flowers are edible - try floating a few in your lemonade, brushing them on sugar cookies, or making flower syrup! With this prolific bloomer you'll have plenty of petals to use however you like. Fast becoming the most favored trailing pansy due to larger flowers, more colors to choose from and more cold tolerance in coldest winter months.
- **Exposure/Soil:** Plant in full to part sun. The smaller flowering violas are more shade tolerant. Must amend the soil if you have poor soil (like red clay). We recommend the Legro Coir peat soil. Require different fertilizer than most plants as they grow in the winter. Use slow release or water soluble fertilizer with Nitrate not Ammonium nitrogen form of fertilizer.
- **Growth:** Just 6 to 8 inches high, but trails an incredible 24 to 30 inches from containers of all kinds (or across the garden floor)! It bounces back beautifully from rainy and rough weather, filling your garden or patio with bold-faced blooms all spring, fall, and in warmer climates, winter. Far more cold-tolerant than older varieties, it overwinters magnificently!
- **Hardiness:** Zone 7-11; Perennial, but treated as an Annual as they are not attractive in the summer, but can survive with other plants shading them until fall when they will return. Will reseed.
- **Foliage:** Evergreen; dainty foliage.
- **Flower:** Masses of big, bright 1½- to 2-inch blooms in many different colors. The effect is electrifying, especially when the blooms arise by the hundred on well-branched, vigorous, unstoppable plants!
