

Grandio Series Pansy

***Larger flowers than standard and very free flowering—more color per square foot!**
***Great to plant in pots, baskets and mixed containers—beefy plants fill out!**
***Great weather tolerance**

Viola wittrockiana 'Grandio Series'

- **Use:** This large flowered series has blooms that are up to 3.25" across and offer blooms from fall to spring (may stop during ice storms in January, but will we rebound)—perfect for pots, packs, baskets and mixed containers. This series is less likely to stretch in the heat.
- **Exposure/Soil:** Plant in full sun. Must amend the soil if you have poor soil (like red clay). We recommend a peat based Soil. Require different fertilizer than most plants as they grow in the winter. Use slow release or water soluble fertilizer with Nitrate not Ammonium nitrogen form of fertilizer for best results from December to March.
- **Growth:** The plants are just about 4-5 inches high and 5-7 inches wide, so they cover themselves with flowers. Space every 6-7 inches apart.
- **Hardiness:** Zone 6a-8a; Perennial, but they don't look good in hot summers so often treated as an annual.
- **Tips:** Give pansies a good drink of water before an expected freeze. The additional moisture in the plants, which means less stress, helps the pansies weather the freeze.
- **Foliage:** Semi-Evergreen; Green foliage.
- **Flower:** Large-flowered: 3.25-in. blooms that offers a full range of blotched and clear pansies for blooms from fall to late spring. The blooms make excellent pressed flowers for crafts or putting in a note or greeting card.
