

# Majestic Giants Pansy Hanging Basket

Well-known Majestic Giants II extra-large flowered pansies have long been the preferred choice for fall and spring markets. This series maintains huge flower size under warm conditions with excellent overwintering and rebloom in the spring.

## *Viola wittrockiana* 'Majestic Giants Series'

- **Use:** This pansy series maintains its huge flower size of 4-in. blooms under warm conditions with excellent overwintering and rebloom in the spring. To maximize your Pansy enjoyment, plant pansies in late September or October and enjoy them all fall, winter and up into April.
- **Exposure/Soil:** Plant in full sun. Must amend the soil if you have poor soil (like red clay). We recommend a peat based Soil. Require different fertilizer than most plants as they grow in the winter. Use slow release or water soluble fertilizer with Nitrate not Ammonium nitrogen form of fertilizer for best results from December to March.
- **Growth:** The plants are just about 8 inches high and 8 to 10 inches wide, so they cover themselves with flowers.
- **Hardiness:** Zone 7-10; Perennial, but they don't look good in hot summers so often treated as an annual.
- **Tips:** Give pansies a good drink of water before an expected freeze. The additional moisture in the plants, which means less stress, helps the pansies weather the freeze.
- **Foliage:** Semi-Evergreen; Green foliage.
- **Flower:** Huge 4" wide flower heads with cheerful faces. Petals like tissue paper dipped in dye remind us of the Victorian era.
