

Asst Calla Lily

**Excellent
for use as
cut flowers!**

Zantedeschia sp.

- **Use:** Well known as a graceful cut flower especially in eloquent, large flower arrangements, what may not be known about this plant is its adaptability. We have grown them successfully in a flower border along with other bulbs and perennials.
- **Exposure/Soil:** Part sun or at least 5-6 hours of sun. However, we have also had success with them in full sun and fairly shady locations also if the soil is good. Water regularly, **BUT DO NOT OVERWATER** when top 3 in. of soil is dry. Use slow release fertilizer for best results. **GOOD DRAINAGE IS A MUST! WILL NOT TOLERATE RED CLAY!**
- **Growth:** Grows 18-30" tall.
- **Hardiness:** Zone 7-10 perennial Enjoy as a houseplant until late April and then you can plant outside.
- **Foliage:** Deciduous. The dark green foliage offers excellent contrast, speckled a gleaming silvery-white.
- **Flower:** Blooms typically during summer. Calla Lilies come in a rainbow of colors.
