

# Lemon Parfait Calla Lily

## *Zantedeschia 'Lemon Parfait'*

- **Use:** Well known as a graceful cut flower especially in eloquent, large flower arrangements, what may not be known about this plant is its adaptability. We have grown them successfully in a flower border along with other bulbs and perennials.
- **Exposure/Soil:** Part sun or at least 5-6 hours of sun. However, we have also had success with them in full sun and fairly shady locations also if the soil is good. Water regularly, when top 3 in. of soil is dry. Use slow release fertilizer for best results. **GOOD DRAINAGE IS A MUST! WILL NOT TOLERATE RED CLAY!** If in doubt it is better to underwater them than to overwater them.
- **Growth:** Grows 18-30" tall.
- **Hardiness:** 7-10 perennial
- **Foliage:** Deciduous.
- **Flower:** In mid summer 1 1/2 - 2" lemony-yellow blooms.

**We love the flowers to cut and bring inside.**
