

# Pearl Glam Beautyberry

**Excellent summer-winter color for your garden.**

## ***Callicarpa 'Pearl Glam'***

- **Use:** Don't settle for a beautyberry that only struts its stuff in autumn - demand one that does more. Pearl Glam® callicarpa is showy starting in spring, with dark purple foliage from the get-go. Late summer brings white flowers that yield violet-purple berries by the hundreds. Upright habit makes this a space-saver compared to more conventional beautyberry varieties, too. Deer resistant, Drought tolerant.
- **Exposure/Soil:** Sun or part shade, but light shade is best for berry set. Moist soil; prefers ample water in hot dry locations.
- **Growth:** Grows 4-6' tall and 3-4' wide. If overgrown prune 18" tall; will regain height in one season.
- **Hardiness:** Zone 5-8; Shrub
- **Foliage:** Deciduous; Dark purple foliage from spring to frost
- **Flower:** White flowers from June until August. Flowers on new growth.
- **Fruit:** Purple berries from September until March.
