

Dazzler Camellia

Tolerates heat and humidity well!
Enjoy fall-winter blooms in narrow spaces.

Camellia hiemalis 'Dazzler'

- **Use:** A large evergreen shrub with a spreading habit and glossy, ovate dark green leaves with finely serrated edges. Produces semi-double, deep pink to rose red flowers in late autumn and winter
- **Exposure:** Prefers sheltered site, sun or shade, and any well drained neutral/acid soil. Extreme summer heat may cause leaf burn; prefers so some shade if planted near a white house due to reflection of sun.
- **Growth:** The plant growth habit is vigorous, upright, and dense. Grows 6-8' tall and 4-6' wide. Prune to keep the narrow habit only within a month of blooms finishing to prevent trimming out following year's Blooms.
- **Hardiness:** Zone 6-9; Shrub
- **Foliage:** Evergreen, Dark green leaves are 2.25" x 1".
- **Flower:** Big bright rosy-red blooms completely cover this 3m evergreen shrub in autumn-winter. In full bloom it really is dazzling - some flowers will be almost single, some fully double, most somewhere in between. Prune only right after blooms fade.
