

Pink Princess Camellia

Pick the flowers and float them in a bowl of water to bring their beauty indoors.

Camellia japonica 'Pink Princess'

- **Use:** As a shrub, it is ideal for use as a hedge or background plant, in groupings, and is especially nice as espalier (trained to grow flat against a wall.) As she grows taller, lower branches can be removed to form a highly attractive evergreen tree perfect for use as a focal point specimen in partially shaded landscape borders and home foundation plantings. A fine addition to pink gardens, Camellia gardens, cottage gardens, cut flower gardens and woodland borders.
- **Exposure:** Prefers sheltered site, some afternoon shade preferred to prevent leaf burn and any well drained neutral/acid soil.
- **Growth:** Quickly reaches 8-12 ft. tall, 6-10 ft. wide.
- **Hardiness:** Zone 7a-9b; Shrub
- **Foliage:** Evergreen. Vigorous, compact, upright, evergreen shrub, valued for small pale green foliage.
- **Flower:** The stunning, nearly perfect full double flowers are packed with petals and produced in abundance during late winter to mid spring. Has demonstrated excellent cold resistance in our gardens and is extremely vigorous with an upright habit. The flowers are excellent for cutting and bringing indoors to display in your favorite vase. Prune only right after blooms fade.
