Camellia sasanqua 'Magic Rose'

- **Use:** Small flowers appear in great profusion in fall on this compact conical camellia. Camellias are used as fall-winter specimen shrubs, shrub borders and screens. The main ornamental feature is their showy flowers in colder fall-winter months when other plants are dormant.
- **Exposure:** Morning shade preferred (prevents frost damage to flowers), but tolerates sun with ample water, evenly moist, humus-rich; high in organic matter, acidic, well-drained (porous) soils, protection from cold, drying winter winds, ample moisture, mulch layer.
- **Growth:** Grows 6-8' tall by 3-4' wide dense growth. Can easily be pruned after blooming to keep them shorter.
- **Hardiness:** Zone 7-9; Shrub
- **Foliage:** Evergreen. Shiny, rich dark green leaves.
- **Flower:** Small very double rose flowers appear in clusters along stems early in the sasanqua season. No browning out on these as they age, they stay clean, clear white until the blooms are spent.
