the winter
landscape!

Camellia sasanqua 'Snow Flurry'

- **Use:** Camellias are used as specimen shrubs, shrub borders and screens. The main ornamental feature is their showy flowers in colder winter months when other plants are dormant. Similar to *C. japonica* but tends to be smaller and more refined. Smaller leaves. Compact grower with a pendulous bushy habit. Heavy bud set!
- **Exposure:** Thrives in partial sun (Morning Sun), but may tolerate full sun with good irrigation, excellent soil (and some work!), . Must amend the soil! They hate red clay! Water regularly, when top 3 in. of soil is dry.
- **Growth:** Can grow 5-7' tall and 3-5' wide. Space plants 3-4' apart to create a hedge. Buds set 9 months in advance so prune only right after blooms fade.
- **Hardiness:** 6-9; shrub
- **Foliage:** Evergreen. Shiny, rich dark green leaves.
- **Flower:** Creamy white, double blossoms from September to November. Fragrant blossoms eventually drop their petals like snow; creating a great late autumn scene.
