Camellia sasanqua 'Winter's Snowman'

- **Use:** The new Ice Angels® series extends the timeless beauty of Camellias beyond their traditional range. Camellia makes a striking shrub as a single focal point anywhere in the landscape. It is particularly beautiful near the front door where visitors can appreciate flowers at close range. Use in a protected place in the garden, such as an east facing entryway, and be rewarded with handsome evergreen foliage and mid season white flowers. Both the blooms and foliage are fine additions to indoor winter cut flower arrangements. Beautiful as a foundation plant, in a container or as part of a Zen tranquility garden. Great as an espalier to cover walls.
- **Exposure:** Prefers sheltered site, prefers a little bit of shade form afternoon sun, and any well drained neutral/acid soil.
- **Growth:** Moderate growing 12 ft. tall, and only 5 ft. wide.
- **Hardiness:** Zone 6-10; Shrub
- **Foliage:** Evergreen; Small glossy green leaves have year round appeal in the garden.
- **Flower:** Pink buds open to white, semi-double to anemone form flowers in winter. Wine red colored new leaves. Mid season bloomer. Prune only right after blooms fade.
