

Verdon Hinoki Cypress

**Collector's plant!
Excellent for
adding
interest to your
garden!**

Chamaecyparis obtusa 'Verdoni'

- **Use:** The shrub is attractive with fans of yellow-green foliage that holds the color well. It is slow-growing and will take 10 years to reach 5-6 feet tall.
- **Exposure/Soil:** Full/part sun and could tolerate a fair amount of shade; Prefers well-draining soil and appreciates slow release fertilizer. Please amend your soil if you have red clay.
- **Growth:** Grows 8' tall and 6' wide at the base in a pyramid shape. Slow growth at 3-6" a year.
- **Hardiness:** 4-8; Shrub
- **Foliage:** Evergreen. Golden crested sprays of leaves that will highlight any garden.
- **Flowers:** Not known for flowers.
