

# Sugartina Crystalina Summersweet

## *Clethra alnifolia Sugartina*® 'Crystalina'

- **Use:** A profusion of upright fragrant white flower spikes attract butterflies. Dense, compact habit makes it good for small gardens. Effective in mass, mixed into perennial borders or along foundations. Grows well in wet areas.
- **Exposure/Soil:** This shrub can grow in sunny locations as well as shady locations but will perform best in locations with partial shade. Water regularly, when top 3 in. of soil is dry. Will tolerate wet soil.
- **Growth:** Slow-growing, compact habit 3 ft. tall, 3 ft. wide.
- **Hardiness:** Zone 4-9 Shrub
- **Foliage:** Deciduous; It has dark glossy foliage and holds its tight dense shape without pruning. The dark green foliage turns yellow in fall.
- **Flower:** Add some fragrance to your late summer garden!
- This dwarf summersweet has very fragrant pure white flowers that attract butterflies in mid-summer

Excellent for mixed borders or woodland gardens. Can also be used in wildlife gardens. Its small size makes it a good fit for narrow beds or smaller gardens. Also good as a foundation plant.
